Durum semolina	1.000	10.00
Fermidor® Smoked	0.300	3.00
Salt	0.200	2.00
Lecitem® 1000	0.100	1.00
Yeast	0.050	0.50
Fermidor® Relax	0.020	0.20
Water	7.100	71.00
Olive oil	0.300	3.00

Total Weight: 19.070

Yield: 95 pizzas

METHOD

1. Add all ingredients (except olive oil) to a spiral mixing bowl.
2. Mix for 6-8 minutes on slow speed and 4-6 minutes on fast speed.
3. Add the olive oil and mix for 1 minute slow speed.
4. Dough temperature should be 24-26°C.
5. Bulk for 30 minutes at a controlled temperature of 25-28°C, covered with plastic..
6. Scale at 200g and mould into round shape.

7. Prove for 15-18 hours at a controlled temperature of 5-8°C, covered with plastic.
8. Leave to rest for 1-2 hours at a controlled temperature of 25-28°C, covered with plastic.
9. Gently pin out and hand stretch to desired shape (1.5mm thick).
10. Place onto a peel and top the pizza with desired toppings.
11. Bake at 325°C for 3-4 minutes.
